Safety and Quality Acknowledgment Form

Dear Homeowner,

Congratulations on your decision to participate in the Pacific Gas and Electric Company (PG&E) Energy Upgrade California™ program and completing an energy upgrade of your home.

Your contractor or rater should have had a certified Building Performance Institute (BPI) Building Analyst perform a "combustion appliance safety test" before and after your project was completed. This is a routine test that participating contractors and raters must complete for all Energy Upgrade California jobs. This test includes checking for carbon monoxide and natural gas leaks from appliances such as stoves, furnaces, and hot water heaters. If carbon monoxide, natural gas or ventilation issues were detected, the contractor or rater should notify you and either correct the issue or contact a PG&E Gas Service Representative to address the matter immediately.

Please review the information below and confirm its accuracy by signing in the space provided.

STEP 1 To be completed by Contractor or Rater. Homeowner to verify for accuracy.

Homeowner Name | Homeowner Address

Homeowner Phone | Homeowner Email

Contractor Name

Date of Combustion Appliance Safety Test | Test Performed by (Name) | BPI Certification ID #

STEP 2 Test result (to be completed by Contractor or Rater; check only 1 box below)

☐ Test results show that home meets Program's combustion safety standards.

☐ Test results found deficiencies, which have been corrected to meet Program's combustion safety standards.

Please list corrected deficiencies:

☐ Test results found deficiencies, which remain uncorrected. Contractor or Rater has contacted PG&E at 1-800-743-5000 to inform them and schedule an appointment to remedy the situation. **Please list all identified deficiencies:**

No combustion appliance safety test was performed because:

☐ Home is all-electric ☐ All combustion appliances do not affect the living space

STEP 3 Homeowner/Rebate Recipient to sign and date

By signing here, I certify that the improvement or installation complies with any applicable permitting requirements and, if a contractor performed the installation or improvement, the contractor holds the appropriate license for the work performed.
